DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, claims 1-12 and 19-21 in the reply filed on August 15, 2005 is acknowledged.

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because tiny scratch marks are everywhere throughout all the drawings. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Specification

The amendment overcomes the objection to the abstract made in the last Office action.

The disclosure is objected to under 37 CFR 1.71, as being nonstatutory description, as set forth in the last Office action and repeated below. The disclosure is totally informal and requires a complete review and redrafting to be put in proper form.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

Claim Objections

The numbering of claims are not proper. All previous claims should be cancelled because all claims have been completely rewritten.

Claims 1-12 and 19-21 are objected because they are not in proper format. For example, identifiers of claims are not proper and all colons should be removed.

With regard to claims 9 and 19-21, it is not proper to refer to a previous claim in the body of the claim language.

Claims 19 and 20 are objected to under 37 CFR 1.75(c) as being in improper form because claim 3 is already a multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 19 and 20 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 and 19-21 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph, as set forth in the last Office action and repeated below.

The claims are totally informal and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a

manner as to present a complete operative device. The claim must be in one sentence form only. Note the format of the claims in the patent(s) cited in the last Office action.

In summation, the claims are totally informal and hence non-statutory.

Allowable Subject Matter

A review of this application reveals that patentable subject matter exists, as set forth in the last Office action. Therefore, the retention of an attorney is highly suggested.

Conclusion

As set forth in the last Office action, an examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450

This action is a **final rejection** and is intended to close the prosecution of this application. Applicant's reply under 37 CFR 1.113 to this action is limited either to an appeal to the Board of Patent Appeals and Interferences or to an amendment complying with the requirements set forth below.

If applicant should desire to appeal any rejection made by the examiner, a Notice of Appeal must be filed within the period for reply identifying the rejected claim or claims appealed. The Notice of Appeal must be accompanied by the required appeal fee.

If applicant should desire to file an amendment, entry of a proposed amendment after final rejection cannot be made as a matter of right unless it merely cancels claims or complies with a formal requirement made earlier. Amendments touching the merits of the application which otherwise might not be proper may be admitted upon a showing a good and sufficient reasons why they are necessary and why they were not presented earlier.

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. The filing of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.
